

GIGABYTE B550M DS3H Ultra Durable Motherboard

Product Specification

|                 |                                                                      |
|-----------------|----------------------------------------------------------------------|
| Brand           | GIGABYTE                                                             |
| Model           | B550M DS3H                                                           |
| Type            | Ultra Durable Motherboard                                            |
| CPU Socket      | Socket AM4                                                           |
| Processors      | AMD 3rd Generation Ryzen                                             |
| Chipset Type    | AMD B550                                                             |
| Memory Capacity | 128GB                                                                |
| Features        | 5+3 Phases Pure Digital VRM Solution   RGB Fusion 2.0   Q-Flash Plus |
| Slots           | PCIe 4.0 x16 Slot                                                    |
